Microprocessing and Microprogramming 22 (1989) 397–398

Subject Index to Volume 22

Access protocol 22 (1988) 353
Actor 22 (1988) 187
Adaptive control 22 (1988) 301
Addition 22 (1988) 75
Algorithms 22 (1988) 115
Array 22 (1988) 277
Array of multiprocessors 22 (1988) 29

B-trees 22 (1988) 243
Base-table 22 (1988) 11
Bezier curves and surfaces 22 (1983) 115
Bit-slice devices 22 (1988) 97
Bus monitor 22 (1988) 367

C-testability 22 (1988) 277
Cache simulation 22 (1988) 141
Carry detection 22 (1988) 75
Cellular automata 22 (1988) 277
Cluster analysis 22 (1988) 347
Code optimization 22 (1988) 39
Code scheduling 22 (1988) 39
Coding 22 (1988) 97
Communication 22 (1988) 187
Compiler 22 (1988) 39, 75
Computer architecture 22 (1988) 39
Computer control systems 22 (1988) 353
Computer hardware 22 (1988) 125
Concurrence 22 (1988) 187
Concurrent programming 22 (1988) 233
Congruential method 22 (1988) 147
Conversations 22 (1988) 175
CSP 22 (1988) 233

Debugging 22 (1988) 243
Decentralised control 22 (1988) 217
Decimal arithmetic 22 (1988) 75
Decoding 22 (1988) 97
Dedicated processor 22 (1988) 187
Delayed branch 22 (1988) 39
Dependency graph 22 (1988) 39
Design automation 22 (1988) 217
Design complexity 22 (1988) 277
Design for testability 22 (1988) 277
Digital signal processor 22 (1988) 347
Disassembler 22 (1988) 243
Dispatcher 22 (1988) 11
Distributed Operating System 22 (1988) 187
Distributed system 22 (1988) 65
Distributed systems programming 22 (1988) 233
Distribution program 22 (1988) 263
Divided differences 22 (1988) 115
Dynamic microoperation priority weight function 22 (1988) 159

Equilateral-triangles 22 (1988) 115
Execution tracing 22 (1988) 243

Fault detection 22 (1988) 277
Fault identification for t-diagnosable systems 22 (1988) 273
Fault tolerant computing 22 (1988) 273
Finite automation 22 (1988) 125
Firmware engineering 22 (1988) 243
Firmware monitoring 22 (1988) 141
Frobenius and companion matrices 22 (1988) 23

GaAs technology 22 (1988) 385
Guarded commands 22 (1988) 233

Hardware description languages 22 (1988) 205
HDL 22 (1988) 217
Heterogeneity 22 (1988) 187
HLL programs 22 (1988) 385
Horizontal microprogramming 22 (1988) 159

Indexed files 22 (1988) 243
Information retrieval 22 (1988) 29
Instruction reordering 22 (1988) 39
Interpreter 22 (1988) 379
Interrupts 22 (1988) 11

Kernel 22 (1988) 11

LISP 22 (1988) 379
Local and global microcode compaction 22 (1988) 159
Logical machines 22 (1988) 81
Logical programming language 22 (1988) 65

Master-slave systems 22 (1988) 11
Matrix polynomials 22 (1988) 23
Memory address tracing 22 (1988) 141
Message 22 (1988) 187
Message communication 22 (1988) 263
Message passing 22 (1988) 233
Micro-diagnostics 22 (1988) 325
Microcomputer network 22 (1988) 353
Microprocessor architecture 22 (1988) 385
Microprocessors 22 (1988) 151, 367

Microprogramming 22 (1988) 97, 141, 243, 325
Monitor 22 (1988) 11
Multiprocessor architectures 22 (1988) 301
Multiprocessor system 22 (1988) 65
Multiprocessors 22 (1988) 315

Network 22 (1988) 187
Nondeterministic programming 22 (1988) 233

Occam 22 (1988) 175
Operating system interface 22 (1988) 81
Operating systems 22 (1988) 81, 125
Optical arbiter 22 (1988) 65

Parallel algorithms 22 (1988) 301
Parallel architectures 22 (1988) 205
Parallel files 22 (1988) 243
Parallel process descriptor 22 (1988) 11
Parallel processing 22 (1988) 23, 159, 333
Parallel searching 22 (1988) 29
Pascal extensions 22 (1988) 233
Pattern recognition 22 (1988) 333
Performance evaluation 22 (1988) 205
Petri nets 22 (1988) 175, 217
Physical methods 22 (1988) 147
Pipelined processor 22 (1988) 39
PLA 22 (1988) 217
Port 22 (1988) 187
Portability 22 (1988) 81
Primitives 22 (1988) 11
Process communication 22 (1988) 11
Processor-memory communication 22 (1988) 367
Producer/consumer process 22 (1988) 11

Queues 22 (1988) 39

Random numbering generation 22 (1988) 147
Real-time environment 22 (1988) 347
Real-time processing 22 (1988) 1
Reliability 22 (1988) 325
